HENNEPIN COUNTY

# GIS notes

December 2017

## Super Bowl LII Preparations

Super Bowl LII (52) is almost here! Important details about parking, transit options and traffic implications during the 10-day Super Bowl event are now available on the [Know Before You Go webpage](#), courtesy of the Super Bowl Host Committee. The site's focus is on visitors to downtown Minneapolis, but it is also relevant for anybody who will be downtown in late January or early February. Check back with the main website for updates to schedules and other event information at <http://www.mnsuperbowl.com/home>

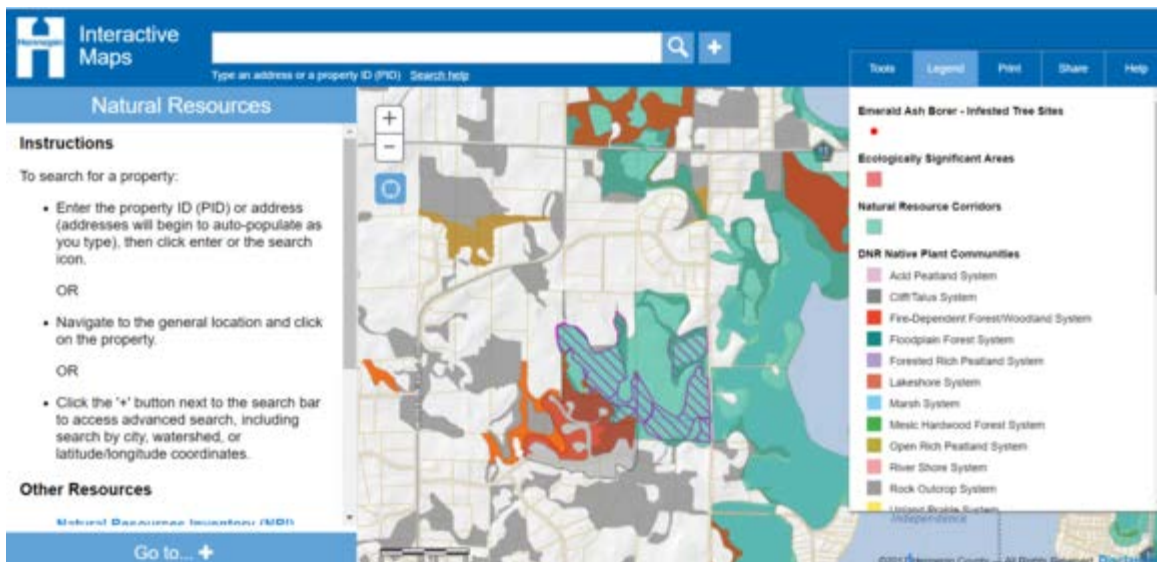

## Hennepin County GIS Users Group

The Hennepin County GIS Users Group (HCGUG) is a collaborative group comprised of public and private sector professionals who use, manage or have an interest in GIS technology. The group meets several times per year. Membership in HCGUG is voluntary and open. The next HCGUG meeting will take place on **Tuesday, December 12th**.

If you would like more information on the HCGUG meetings or have any other questions, please contact the GIS Office at [gis.info@hennepin.us](mailto:gis.info@hennepin.us) or visit the News page at <https://gis.hennepin.us/home/>

## Natural Resources Map - New Features

A number of new features have been added to the [Hennepin County Natural Resources Map](#), most notably:

- Presence of septic systems and wells are now reported in the selection results.
- Natural resources results are now returned for locations outside of parcels.
- A link to Google StreetView is now available in the Natural Resources Links when a parcel or point location is selected.
- A new swipe tool has been added in the map layer list. This allows you to display two base maps (including historical imagery) side-by-side and swipe across the map to gradually switch between them.

## Maps of Interest

Check out these two maps related to winter recreation as the cold season approaches!
